

1181 Nova Scotia census abstracts. - 1861. - 1.5 m. - Series contains the original abstracts of census returns created by the Board of Statistics from the original household returns. The only information in the abstracts is the name of the householder and gender, age and mortality information on other members of the household. The abstracts have been grouped by electoral district and were bound in 1932 into volumes for each County. A separate abstract is included for residents of the Provincial Hospital for the Insane and includes information on their residence before entering the Hospital as well as the length of their stay. - Title supplied from contents of the series. - The c.50,000 original household returns were completed by each household head in the province. These were known to have been sorted alphabetically and bound into 118 volumes which apparently were destroyed in a waterfront flood. Information taken from the household returns, such as individual names and ages, and information on individual nativity, religion, and occupation, and data on primary production, manufacturing and institutions, is not included in the 1861 abstracts. Some of this information appears in aggregate data for each electoral division of each county in the published census report that also includes county level information on the assessed value of property and the schedule for the Provincial Hospital for the Insane. See: Census of Nova Scotia, taken March 20, 1861, under act of provincial parliament / Nova Scotia. Board of Statistics. - Halifax : Printed by E. M. McDonald..., 1862.
